Among the sites you will visit are

- **China Science & Technology Museum,**

- **Shanghai Science and Technology Museum**

- **Zhongguancun Technology Park, and**

- **Shanghai Supercomputer Center.**

ANCIENT 'ROBOTS'

In the Western Zhou Dynasty in China, a skilful craftsman named 'Yanshi' made some puppets, which could dance and sing. These might be the earliest 'robots' in the world. In the age of Alexander the Great, Greeks also made a sculpture, which used water, air and steam for power. It was said that it could open doors by itself, and could use steam power to 'sing'.
Ancient robots were simple mechanical structures that imitated human beings but they could not access information from outside, or process information. So they could 'work' but could not 'think'.

Hosted By BIPT & SOU

Beijing Institute of Petrochemical Technology

Shanghai Open University

Make New Friends

Learn Mandarin

Work with Software Engineers to Create a Social Media Game

Computer Science Projects Class

Raytoon Software

Campus Tours

Stay on Campus
