# Study Computer History in England

Oxford Summer Program
July 6 – July 25, 2007
CPSC 2555/CPSC 5555U/G
/ ITDS 5555
Special Topics: History of Computing

- Experience first-hand the history of computing by active immersion in the culture and society at England. Students will visit various sites to observe how early computing devices were developed and evolved into the computers of today. For instance, a visit to Bletchley Park will provide insights into how early computing devices were used to crack the encryption codes during World War II. A visit to the Museum of Science in London will provide an opportunity to see a replica of the first computer.

- You will stay in the CSU Spencer House near Oxford's medieval city center

- Three-day weekends are reserved for optional group excursions or independent travel.

- Contact Dr. Wayne Summers (summers_wayne@colstate.edu / 706-568-2410), for information about the class [http://csc.colstate.edu/summers/NOTES/5555-history/]

- Contact Dr. Neal McCrillis for information about the Oxford Program [http://cie.colstate.edu/oxford.asp]

Registration Deadline March 2nd
